

WaveWare Technologies, Inc.

"We Deliver Information at the Speed of Light"

## **Enterprise Messaging Software**

## WaveWare Enterprise SMTP Email Server

"How-to Send an Email to a Pager"

#### **Please Note**

This "How to Guide" is only for Explaining How to Setup and Configure Enterprise Messaging for use with the Enterprise SMTP Email Server Option and How to Create the Email Account(s) Required in Order to send an Email Message to a Pager.

WaveWare Assumes that the Enterprise Messaging Software has already been Installed and Configured and is Sending Messages to Pagers.

If Enterprise Messaging Software has Not been Previously Installed and Configured, Please Refer to the Enterprise User Manual for Complete Setup and Configuration Information.

This Guide will be working with Microsoft Outlook 2007 as our Email Account Configuration Examples.

### **Quick Overview**

#### What you need to get Started:

- Purchase and Install the "Unlimited Clients" Version of Enterprise Messaging Software
- Purchase and Install the Enterprise Messaging "SMTP Email Server" Option
- Register to Activate Both the Enterprise Messaging Server and the SMTP Email Server

#### In Order to Send an Email to a Pager:

- Configure the Enterprise Messaging Server Recipients (The Pagers and the Associated Names)
- Configure the Enterprise Messaging SMTP Email Server (Recipient Message Formatting and Domain)
- Configure the Email Account(s) to be used with the Enterprise SMTP Email Server and Recipients

#### Options of what can be seen on the Display of the Pager:

- Identifying the Sender of the Email Message
- Use the Subject Line of the Email Message
- Use the Body of the Email Message
- All of the Above

# WaveWare Technologies, Inc.

"We Deliver Information at the Speed of Light"

## **Enterprise Messaging Software**

## **Getting Started**

### **Configuring the Enterprise Messaging Server "Recipients"**

Configure Recipients							
	Туре	Service	Book	Address	Name	Priority Password	
77-	E-Mail	E-Mail	Book 1	Bob@myEmail.com	Bob	N	Add
ARC	Text	On Site	Book 1	100	Curtis	N	Adu
REC	Text	On Site	Book 1	101	Bobby	N	Dalata
REC	Text	On Site	Book 1	102	Dick	N	Delete
							Books Services Test
							OK

The Recipients should have been "Configured" Previously, from when Enterprise was "Originally" Setup. If Not, Please do so before Proceeding any further. Please refer to the Enterprise User Manual.

For use with SMTP, we will be Referring to the "Address" and the "Name" Fields of this Screen.

#### Address and Name Fields:

- The "Address Field" is where you Enter the Pager ID Assigned to the Name
- The "Name Field" is where you Enter the Name that will be Associated with the Pager ID

We will be Sending an Email Message to the "Name" Associated with the "Pager ID". In this example, only Email Messages Addressed to Bob, Curtis, Bobby, or Dick will be Successfully Processed by the SMTP Server. Examples of Successful "Email To: Addresses" are <u>curtis@whatever.com</u> and <u>curtis@20.0.2.203</u>

Note: As you can see in this Screen, you can also Enter the Email Address to be Associated with a Name. This is used within the Enterprise "Client" itself so that a User can Send a Custom Message to an Email Address instead of a Pager Directly from the Enterprise Client.

### Enterprise SMTP Server

#### Configuring the Enterprise Client "SMTP Server"

Note:

The SMTP Server function runs in one instance of the Enterprise Messaging Client Windows Application.

#### From the Client Main Screen's Menu Bar,

Click on the "Configure" Text and from the Drop-Down Menu, Click on "Mail Server"

💐 WaveWar	WaveWare Enterprise Client							
File View	Configure Edit Help							
Recipient	Options	Ctrl+O	to be Sent - 0	Char				
	Recipient Groups	Ctrl+G			1			
Recipient	Mail Server	Ctrl+M			Send

Click on "Mail Server"

**Next: SMTP Server Configuration** 

Enterprise SMTP Server – Continued How to Configure the "SMTP Server"						
<form><form></form></form>	A B C D	SMTP Server Configuration   A - Domain Filtering:   If Enabled, SMTP Server only Processes Email   Messages whose "To: Address Domain" Matches the entered Domain Name.   If not Enabled, SMTP Server does NOT Filter out Email   Messages Based on Domain Name in the To: Address.   B - Recipient Message Formatting:   For allowing the Choice of what Information is Sent to an Email Recipient or to a Pager.   Check all the Apply.   C - Group Messaging:   If Enabled, will Compare the Email Name in the Client Groups List and Send a Message to all the Names Associated to that Group Name.   If not, then only the Client Recipient List will be used for Comparison to Incoming Email Names.   D - Logging:   If Enabled, Allows Logging of all SMTP Transactions.   Note: This should only be Enabled for Troubleshooting Purposes.   E - Registration:   Tells you if the SMTP Server is Enabled.   If not Enabled, then this Option needs to be Registered.   If is a Separate Feature Option to be Purchased.   Note: Please see the User Manual for Instructions on How to Register this Option.   on - Contact your Software Dealer.

# Adding a New Email Account - Continued **Detailed Descriptions - Continued** D The Outgoing Mail Server Field has to be Correct so that Outlook can Communicate to the Enterprise SMTP Server and Deliver Email messages. The IP Address that you should Enter is the IP Address of the PC that is Running Enterprise Messaging Client with the SMTP Server Option Enabled. That PC Must have a "Static IP Address" in Order for the Email Connection to Remain Stable. E and F The Software doesn't care what Name is in this Field and also the Password can be left Blank, unless the "Outgoing Mail Server" Requires Authentication. Refer to your other Outlook Email Accounts to Reference How to Configure these Fields. G This is to Test the Non-Domain Account. Click the "Test Account Settings" Button. All Tests should Pass Before you can Continue. Test Account Settings Congratulations! All tests completed successfully. Click Close to continue. Stop Close Tasks Errors Tasks Status ✓ Log onto incoming mail server (POP3) Completed ✓ Send test e-mail message Completed
