Timer Time Setting *	24 hr Clock (Set Only when Timer is Active)		GALEDTIME=HHmmSS
Timer Month Language	English (Set Only when Timer is Active)	ENG	GALEDLANG=ENG

** Priority Cap Codes: 0= Non-Priority and F= Priority (For each Cap Code Slot, 6 Total).   For Instance: If Cap Code 1, 3 and 5 are Priority and 2, 4 and 6 are not Priority then the OTA Command would look like this: GALEDPRICAP=F0F0F0   *** This is the Message that will Show when No other Messages are being Displayed on the Sign, for NO Message, Send Nothing at all.
Note: A 911 Prefix is used for Non-Priority Cap Codes and a "Priority Message" has to be sent in order for the Relay to work, if the Relay is Activated.
Any Command sent must have No Spaces in order to work.   **** If "OFF" Send "ON" instead to Turn ON that Feature.
